DOTHAN, ALABAMA, THURSDAY EVENING, MAY 23, 1913.

NUMBER 219

GOVERNOR O'NEAL HAS SEVERAL PLANS TO SAVE STATE MONEY

185 THAT ALL OBLIGATIONS OF STATE WILL BE MET DURING ADMINISTRATION

When asked about the condition of the State treasury today Governor O'Neal stated that there are a number of ways of securing money and that all of the obligations of the state will be met during his administration. The money appropriated for the county fairs cannot be paid out at present but arrangements can be made by the fair associations with banks whereby the money can be made available. This action was brought up by the Black Belt fair association of Selma, through their secretaries, in regard to the statement that there are a number of ways of saving the state a healthy sum annually by cutting down expenses in certain departments. The Governor stated that he has several plans under way whereby there will be retrenchment and that he has been considering them for some time. The Governor feels that he is as familiar with the situation as are certain persons not in the executive department and that he intends to put the state on a business-like basis during his administration.

Alabama is one of the few states in the union that pays for the feeding of prisoners who are held on charges in the county courts, and who when convicted give their services to the county. This is one of the matters that will be remedied in the case where there is an extra court established or an extra judge placed on the bench this expense must be borne by the state where it ought to be charged against the locality in which the court is held. These and other reforms will be placed in effect by the Governor when the proper time comes.

WANTS RURAL SCHOOLS TO BE GRADED

A vigorous campaign will be launched before the teachers institutes this summer for the purpose of securing the grading of every school in Alabama in uniform manner says the Montgomery Times. The campaign will be under the direction of N. R. Baker, state supervisor of rural schools who has recently gathered much data on this subject.

According to his year's report by Mr. Baker from the reports of the county superintendents of education there are only ten counties in the state that show 100 per cent of their schools graded uniformly. These counties are Limestone, DeKalb, Elmore, Jefferson, Lee, Choctaw, Marion, Escambia, Crenshaw and Mobile.

There are thirteen counties that show between 75 and 100 per cent of the schools uniformly graded. In these cases Montgomery with 85 per cent, there are 6 schools for white children in this county of which 57 are graded.

According to last year's report there were 66 rural schools in Alabama of which only 269 were graded. This number will be increased in this year's report by about twenty per cent in Illinois, Indiana, Texas, Massachusetts and a number of other states the percentage of graded rural schools is one hundred per cent which is a perfect record and in the opinion of Mr. Baker there is no reason why this state of affairs should not exist in Alabama. Over half the counties of the state show a percentage of less than fifty of the rural schools as not uniformly graded.

The matter will be pushed by Superintendent Baker who will ask the co-operation of all the teachers

in the plan to secure uniform grading in the schools of this nature in Alabama.

PROGRAM OF HIGH SCHOOL COMMENCEMENT MAY 22, 23, AND 24, 1913

Wednesday

8:30 P. M.—Alumni Banquet

Thursday

9:00 A. M.—Grammar School and Rose Hill School meet at Grammar School auditorium to receive reports

600 BUSINESS & RESIDENT LOTS IN BEAUTIFUL CALLOWAY FOR SALE

The Proposed Terminus of Three Projected Railroads to Deep Water on St. Andrews Bay—The Only Logical Point on St. Andrews Bay for the Transfer of the Cargoes of the River Steamers to the Ocean Vessels. Every Lot Offered for Sale Warranted High, Dry and Level—The Southern Extremity of the Famous Red Level Ridge, That Runs From Marianna to the Gulf, Surrounded by the Richest Farming Lands on St. Andrews Bay. Terminals Reserved for Either or All the Projected R. R. Streets All Cut Out and Ready For Inspection. 400 Lots Already Sold to Many Leading People of Birmingham, Montgomery, and Other Parts of Alabama and Georgia.

We have just closed a deal with the St. Andrews Realty Co. which puts us in posession of six hundred of the best remaining business and residence lots at Calloway, Fla., one of the new towns on the best harbor of the gulf coast. About 400 lots have been sold to people of various parts of Alabama, Georgia and Florida, and building operations are being pushed. The average elevation of these lots is 20 feet above high tide, and they are practically level, just rolling enough to drain properly. People have been living at the location for a hundred years and the health is unsurpassed. Our investigations have lead us to the belief that Calloway will be the best and largest city on St. Andrews Bay, and on this belief we reccomend these lots to investors and home-seekers. The prices are as follows:

Eighteen Resident Lots at	\$10.00 each
Sixty-Four Resident Lots at	\$15.00 each
Thirty-Five Resident Lots at	\$20.00 each
Forty Resident Lots at	\$40.00 each
Twelve Resident Lots at	\$30.00 each
Twenty-Six Residence Lots at	\$35.00 each
Twenty Residence Lots at	\$40.00 each
Seventy-Two Residence Lots at	\$50.00 each
One Hundred and Five Lots at	\$60.00 each
Thirty-Two Business Lots at	\$70.00 each
Thirty-Five Business Lots at	\$75.00 each
Forty-Five Business Lots at	\$80.00 each
Twenty Water Front Lots at	\$100.00 each
Fourteen Water Front Lots	\$125.00 each
Seven Water Front Lots at	\$150.00 each

TERMS—The above prices are spot cash, but if the buyer desires to take advantage of the installment payment plan, we will accept as little as one tenth of the total amount cash, [provided that no first payment shall be less than \$5.00] and the balance in monthly payments of one-tenth each month with 8 per cent per annum interest added for the average time the installments run.

We have maps, plats of the city and all other necessary information at our office in the Farmer-Porter-Crawford Building on the corner of North Foster and East Troy Streets. If further information is desired, write or phone 428, Dothan, Ala.

SAVED FROM DEATH BY PISTOL SHOTS

Long Beach (Cal) Man Is Seriously Injured in a Most Peculiar Accident.

TRAPPED ON BRIDGE

Hung With Stiffening Fingers to a Blended Iron Rod on End of Big Bascule—Leg Amputated to Save Life

Long Beach, Cal.—Edward Markgraff, aged thirty, an employee of the Edison power plant, on the Inner Harbor, passed through a thrilling and terrifying experience the other night which will remain to his dying day. Flinging with stiffening fingers to a slender iron rod on the end of the bascule bridge over the harbor on June 10, it rose in the air following the passing of a freight train. Markgraff, who admits that all of his past life is before him and the agony caused by his fall was soothed by the thankful knowledge that he was still alive, only the presence of mind of his companion Harry Huff, and the quick wit of the bridge tender saved Markgraff from a frightful fall and probable death by drowning.

Markgraff and Huff are employed on the night shift at the Edison company and were on their way to work shortly after midnight and on their custom walked across the bascule bridge. This had nearly reached the end, causing them to stop. The darkness when the bridge tender became aware of a patrol of the little boat to raise the draw. In came a boat, should work passenger in the railroad, it being required to keep the road open when trains are not on it, the bridge. Huff left the promenade adviser of the situation as it was pointed to the lever and a few hours, enough to safety on the short route. Markgraff was a few feet before he could have too far to jump but in the

BEES ARE QUITE PROFITABLE

An Adjunct to Farm Nothing Pays So Well When Properly Cared For—Work for Women

By MGR. J. TAYLOR (9-10)
In regard to bringing I know of nothing in properly cared for, that you will consider the time spent and the money invested as bees last year, two colonies produced 20 pounds per colony of surplus honey, which sold for \$2.00. The bees cost \$1.00 in a colony of 10,000 or \$80 per colony. So a colony of 10,000 cost \$80.

One keeper net for him and 100 pounds of honey from his bees cost \$12.00. He sold it for 10 cents a pound. This gives him very large profit with no saved methods in regard to do a better. One farmer in this community manages to clear \$800 each year from his bees. He keeps from twelve to fifteen colonies and his farm does not suffer from neglect in the least.

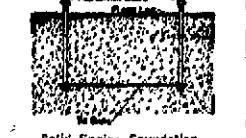

If the man has not time to attend to the bees, the women can look after them. They are generally about the house and have a better opportunity for watching them.

For gentleness in handling, ability to gather honey and to keep bees from mouth I prefer the Italian. Any other will answer the purpose. It should be kept dead all through, and for wintering out of doors a chest should be placed over the bees which insulates.

TO MAKE FOUNDATION SOLID

Gasoline Machine Will Not Be Good Work Unless Placed on Good Substantial Base

It is more sensible to expect a gasoline engine to do good work unless it is mounted on a solid foundation. There is nothing better than concrete for this and when placing same foundation footings should be set in the concrete or shown in the accompanying illustration, giving the Prairie Farmer. These footings can be made of any blacksmith or to meet any iron work shop. They are placed in the concrete when it is poured and should, of course, be placed so as to engage with the holes in the body of

Gasoline Engine Foundation

the engine. Care should be used not to injure the threads on the ends of the rod and to this end it is best to keep the nuts on snug.

Starting Plants In Houses
A good way to use the cans or cigar boxes to plant cabbage, lettuce, parsnip, pepper, radish and tomato seeds in them about the middle of this month. Place the cans or boxes in the kitchen window.

Cauliflower, celery and egg plant may also be started in the house.

Bore holes in the sides of these boxes or in the bottom to bottom in order to give ventilation. Start cucumber and squash seeds in straw berry boxes.

Spreading Manure

Get into the habit of hauling manure to the field every day as it is taken from the barn. The sooner manure is spread in the field the smaller the loss of fertility incurred and the smaller the amount of labor required to handle it.

Bees and Farm Notes
Asparagus will grow in any good well-drained farm land.

Onion sets should be set out just as early as ground can be worked. Almost all our common garden vegetables require a somewhat alkaline soil.

Selling all the hay and grain raised on the farm is a sure method of selling the farm.

Young cabbage plants require thorough protection in the bottom and cold frame.

It is seldom that the very early varieties of potatoes yield as well as those a little later.

Long, straight rows will make easier work with the horse and the rear wheel barrow.

For any land the manure must be from a proven superior to that of the medium red varieties.

French pruning measures are needed to bring many old trees into bearing, but it need not all be done the first year.

There is no danger of an overfed soil for asparagus. In fact this crop can only be grown profitably on very rich land.

Did you ever think how much ground a root crop of corn will plant? It is just that much ground wasted if you plant a root crop.

It is idle and useless to expect good crops from inferior seed as it would be endeavor to breed the unripened with from scrub stock.

Asparagus roots properly planted, fertilized and given good culture will continue to produce large spears for fifteen to twenty years in succession.

Asparagus is a perennial and can be grown on ground that is too low and moist for the medium red or manure soil. It is grown equally well on high ground.

2 or 3 Pair of Shoes For The Price of One

Look for the hand bills Pay No Attention to the sensational signs of other merchants

This is the only genuine sale now going on in Dothan.

R. L. MARTIN & CO. in Charge

Give the chickens grit.

Kill out the peach borers.

Don't overfeed the little chicks.

Alfalfa makes an excellent roughage.

The rest in the clothes will not pay the rest on the farm.

The Babcock test is just as accurate as the man who uses it.

Don't keep eggs for hatching longer than ten days or two weeks at most.

Milk at 90 degrees is about the temperature at which it separates best.

It rabbits have gnawed on the outer bark wrap the round with loth.

Barley and oats as well as wheat are usually improved in quality on fax land.

Working the soil when it is wet will make it coarse and lumpy the whole season.

As soon as your leiture is large enough feed it to those chickens you are fattening.

There is no better way by which the corn crop can be used than through the silo.

You can not make as good silage from dry cornstuffs as you can from mature green corn.

Plant a row of the large tame sunflowers along the fence for hen feed at moulting time next fall.

The strawberry is one of the small fruits which apparently thrive better in acid than in alkaline soils.

The fleece of the ram should be dense even in quality and of a strong clear white fiber throughout.

A pure bred bull is often a poor bred bull. Pedigree and performance are not interchangeable words.

It is to the poultryman's interest to keep his stock to the best type healthy and vigorous all the time.

A half day's work in the orchard with the manure spreader will show up when apples are ripe next autumn.

No profit in keeping old ewes that have lost their teeth. Better fatten them the best you can and get rid of them quickly.

You should know the working qualities of your ewes, watch them from the time they farrow and see how they treat the little follows.

The average cow ought to have four to six weeks rest each year. A good time to dry them off is just as they begin to make an udder.

Coal oil will soften the old paint brushes used last year. Place them in a can of the oil and wash them well in warm soapsuds.

Feather pulling may be checked by dissolving powdered soap in water and washing the feathers of the birds that have been plucked.

To keep up a heavy milk flow a cow must have all the water she can drink for every 100 pounds of her milk contains 87 pounds of water.

Every garden for the house should have grapes and many market gardens could be made more profitable by growing this splendid fruit.

Many people have the idea that brown shell eggs are the richer but the difference between white and brown eggs is only in the color.

The best milking calf is the one we consider it that it will help to increase the amount of fat falling into the milk during the process of milking.

One of the most general methods adopted for cooling milk is to place the cans in a vat containing water which reaches a point slightly above the surface of milk.

Cleanness in handling in straining and in separating the milk is a thing that cannot be too religiously adhered to for prevention is the key word to quality in all dairy work.

The cow is a fertilizer factory a butter factory and a skim milk factory yet many farmers feed her as little grain as they dare in the winter and none at all in the summer.

Plan to have a good big patch of strawberries for home use and to rear your plants early in the season. The big crop of berries is from vines that have a long season of cultivation and growth.

Horses with sore eyes can be greatly relieved by applying one part coal tar disinfectant and eight parts vase oil. Do not get grease in the eyes. Also use saturated solution of borax acid and salt water as a wash.

There is hardly enough manure to make a good fertilizer for pigs but they should be cooked and mixed with corn chaff middlings etc. Corn meal and potatoes well cooked into a soft mush makes an ideal feed and is greatly relished by pigs, because it is a very nutritious food.

BOY PLUNGES INTO DEEP OPEN SEWER

The Youngster Is Swept Out into the Ocean, Where the Body Disappeared.

COULD NOT BE SAVED

Victim of Tragedy Was Doing Balancing Stunts at the Tops of the Pillings When He Topped Into the Water

New York—By tumbling into a street excavation opposite 31st and Seventy-first street the other day William Boheler, about four years of age, plunged into the uncovered sewer 12 feet below and was swept out into the East river three blocks away where the body sank and was whirled with the tide.

For a distance of almost fifty feet a half score workmen saw the body carried in the thick murky waters of the sewer and then ashore where the excavation ended a hundred feet or so west of First Avenue.

The excavation is the width of the sewer and shaded over with heavy planks on each side. The top was removed for repairs and for a distance of 50 feet is uncovered. The shoring planks rise above the street level in irregular pilings for the purpose of fencing the excavation and preventing unwary pedestrians from tumbling in. But there are breaks here and there in the shoring and the boys that swarm the neighborhood have persisted in walking through and walking along the edge of the excavation or doing balancing stunts on the tops of the pilings.

The victim of the tragedy was doubtless one of these balancing stunts when he suddenly toppled over and went headlong down into the rushing water below.

There were no workmen within twenty feet of where the boy splashed

He Tumbled Over

and there was no possibility of saving him. The tide in the sewer washed swiftly toward the river and the small boy was borne along as if it had been a cliff. To the eye who looked on it was impossible to see him only a matter of seconds before the boy had vanished.

Several workmen and a troupe of boys strayed down the street for the 11th floor but it was not likely that they went far as the body of the boy was visible along. When they reached the pier that looks down on the mouth of the sewer they provided themselves with hooks and ropes and waited for about half an hour.

They watched in vain. Later experiments were made by tossing pieces of timber into the excavation and trying to keep pace with their progress down the sewer but the fastest runner among the boys in the district were unable to keep pace with the progress of the rushing water.

The tide was running out at the time the boy was lost—about 4:15 o'clock.

Shows' Nerve Then Faints

Camden, N. J.—At the joint of a revolver Mrs. Mary Borish of Master street and Forty avenue the other afternoon compelled a thief to drop some jewelry he had stolen after he had engaged board at the house and then hustled him into the street. Hardly had the thief disappeared before the woman fainted but soon was revived by neighbors. Faintly in the day a well-dressed youth who gave the name of Stanislaus Bobliski was directed to a room upstairs. Mrs. Borish later became suspicious and caught him in the act of taking jewelry from her room.

The Governor Promised Albany, N. Y.—When Governor Dix's auto became stuck in the mud, a farmer refused to pull it out until the governor would promise to sign a good roads bill. The governor promised.

WANTED—Responsible party wants nicely located, close in, furnished or unfurnished house of about six rooms about June 1st. Best references. Address Box 844 Valdosta Ga.

CLEAN UP DAY

You are invited to attend that Monday May 2 will be general clean up day for the city of Dothan. The Police and Street Force will be in readiness to assist in the work by having the Street wagon to haul off all the trash and debris in the garbage cans or boxes on the edge of the sidewalk.

All property within the city limits of the City of Dothan will be inspected on the above date by the Health Officer and the Assistant Health Officer and if not in sanitary condition the owners shall be liable with according to the ordinances governing same.

WATERBURY DELEGATES

IN STATE OF NEW JERSEY

DOES NOT SEEM DISCOURAGED

OVER DEFEAT IN OHIO BUT

FEELS CONFIDENT

Washington, May 23.—Claiming 670 delegates to the Chicago convention as thirty more than enough to assure him the nomination, Pres.-elect Taft in a statement today declared he was going into New York to make assurance doubly sure.

He will leave Washington at 7 o'clock tomorrow morning and make his first political speech at 10 a.m. in the evening.

The president's statement was issued after a day of activity at the White House. Political conferences with his managers and appointments with members of his cabinet were followed at 1 o'clock by a meeting of the full cabinet.

It was noted later that this meeting was a social one, routine had more to do with it. Members of the cabinet admitted that the political situation had been reviewed in considerable detail.

One opponent's quote from a statement of mine made in Cleveland that the field in my home state must be very gratifying would be his desire to see if the president in statement would settle the question of my nomination. This is the reason I shall have at least one or two votes from Ohio, including the delegations at large for we have our assurance that we shall control the state convention.

This will complete a clear majority in the national convention.

Indeed in addition to the votes from Ohio delegates elected for me from other states of which I have been advised since my Cleveland statement give me at the most conservative estimate 570 out of 1,075 votes in the convention—thirty more than necessary to nominate.

I am going to New Jersey to take part in the coming campaign there for the same reason that I went to Ohio and such delegates as we may receive from New Jersey will thus make assurance doubly sure.

Early in the day Mr. McKinley of the Taft headquarters claimed at least 600 delegates for the president's estimate while smaller was declared at the White House to represent rock bottom figures which were expected to be materially increased.

The meeting was held on the spacious veranda which was made a bower of beauty with its decorations of palms, ferns and cut flowers.

After roll call which was responded to by giving names of prominent figures in American history who were of Dutch descent.

A short business meeting was held to decide on the study for the coming year.

After much discussion it was voted that the club continue with the May View course and like Italy and Greece for next year's work.

This meeting concludes the program for this year. The next meeting will be for the purpose of electing officers.

Mr. and Mrs. William Crawford

arrived the guests were invited up stairs by the lovely little daughters of Mrs. Crawford and were received by Mrs. Davis assisted by Mrs. Crawford who served delightful refreshments.

NUMBER 211

COLUMBIA CITIZENS JOIN HANDS WITH DOTHAN ON PACKING HOUSE PROPOSITION

SUBSCRIBED WITHIN
HOURS TIME AT COL-
UMBIA YESTERDAY

Committee composed of Messrs H. Malone, Joe Baker, W. M. Levine, D. W. R. and L. G. Biggers went to Columbia yesterday morning for the purpose of ascertaining the local sentiment at that place in regard to the packing

arrival Messrs J. M. Kourneas and J. E. McNaull calling the leading business men of our sister city and the property before them. Mr. Kourneas, the necessity of a packing house and the financial connection with it and Mr. showing the statistics in the Southeast Alabama to house matters proving clearly that the conditions require the successful operation of a packing house plant exist vicinity. Many questions asked by Columbia people and satisfactorily answered by a members of the Committee

in the subscription list was within five minutes \$7,900 received there being no less on the part of anyone and pledging themselves at the time of this subscription that they double their amounts if it be necessary

The features of the day showed how much interest Dothan and Columbia people in this project occurred immediately after lunch when three able men drove seven miles of Columbia to the mansion of Mr. T. L. Blackwell, home of Mr. T. L. Blackwell, him busy engaged with all affairs put the proposition him and secured his support and his consent to become a member of the Board of Directors of this project is incorporated

Blackwell is recognized as one of the most head men and native farmers in Southeast Alabama and apparently is the unan- chievement of his fellow townsmen the directorship

One of the pleasant features of the day was the Dothan Committee in the elegant luncheon served at Hotel Alford at which they were joined by Mr. J. M. Kourneas who was so very deliciously distinguished Mayor the Joe Baker expressed his intention of becoming a citizen of Columbia and boarding at the Alford

is no justice on record when citizens of the town were as it was in favor of any proposal as this one. Columbia claims her citizens some of the best and most successful stock and cattle in Southeast Alabama and they are more forceful than the man the importance of a con- and permanent market for live and of a packing house plant will make this market as men as before stated subs and from two to ten shares each at a moment hesitation when to do so. The subscribers and amounts are as follows

Koor 0 \$1000

Bardors 100
Onkies 100
J. Askew 500

It brings the aggregate stock to \$50,600.00 for subscriptions could have been had the solicitation

CHAPTER MEETING

Regular convention of the Dothan Chapter No. 312 at the Lodge until this Friday evening at 8 o'clock sharp. The Mark Master degrees will be conferred upon three candidates and a large attendance is especially requested.

By order of the High Priest L. G. Biggers Sec

U. S. MARINES ARE SENT TO HAVANA, CUBA

ARMED FORCES ALSO ISSUED 16
NAVAL STATIONS TO BE
IN READINESS

of operation now is for a committee to prosecute further. The plan from Columbia and Dothan to meet at some other city at an appointed time for the purpose of ratifying the proposition before them. During the coming week Ashford, Gordon, Headland and Slocomb will be visited, and reports from these places indicate that the response will be equally as enthusiastic as at Columbia.

Hard headed business men are more convinced than ever that this proposition is a certainty and a new day is dawning for all of southeast Alabama. Southwest Georgia and West Florida. Let every citizen of this section get behind the movement and push and there will be no possible doubt of its ultimate success.

TAIT ASKED TO WITHDRAW BY ROOSEVELT'S MANAGER

Washington, May 23.—A nation Dixon head of the Roosevelt nation headquarters today issued a statement practically calling upon President Taft to withdraw from the presidential race. Ohio makes the tenth republican state where the candidacy of Mr. Taft and Colonel Roosevelt has been submitted to the republicans for decision, he said.

The verdict has been an unanimous, one in every state and Taft and his managers have fully realized this said the statement.

I realized an adverse vote of Ohio meant the death knell of the movement to renominate Mr. Taft. Realizing this Mr. T. Franklin, state at Cleveland last Thursday. The vote in Ohio my home state, will be the decisive one and will settle the question of Taft and Wilson.

Swain from Pennington, Lt. J. Hamilton from the Virginia State Legion, two Birmingham players from Australia and several other great players have already signed up with Dothan and are ready to join their comrade.

MORE PLAYERS WILL JOIN DOTHAN AT PENSACOLA

Dothan's baseball team will be re-inforced at Pensacola by three or four fast players who will be with the locals permanently. The Florida team which is composed mostly of soldiers at the fort at Pensacola is a strong bunch and extra arrangements were necessary to compete with them but Dothan was already making preparations to strengthen our bunch. The new players will join Dothan there and will play tomorrow and Sunday and will return to this city Monday for the season.

It is not yet known when the next game will be but arrangements are being made for some good strong team to come prepared for a period with one of the finest on shore teams in Alabama.

Swain from Pennington, Lt. J. Hamilton from the Virginia State Legion, two Birmingham players from Australia and several other great players have already signed up with Dothan and are ready to join their comrade.

WHEELING ITEMS

A. M. Bird and family of Bethel have been visiting relatives near here this week.

J. R. Saunders of Slocomb was home a while Sunday.

Joe White of Tabernacle attended the singing here Sunday afternoon.

Josee Kinney and Bill Holloway was here from Bach on Sunday.

Glenda Reeves and Cleo Gumble were in town from Daleville Sunday.

Harvey Scarborough who stood the state examination at Ozark in April passed. He now holds a second grade certificate.

Mrs. Anna Holloway and Rev. Sellers of Bethel attended the singing Sunday afternoon.

Roscoe Scovens of Claysdale was here a while Sunday afternoon.

R. B. Williams and wife visit relatives near Hartford Saturday.

C. C. Turner and Robert Stewart of Pigeon Home were here Sunday.

Will Clark of Dundee was here with Monday morning.

Albert Gilley went down to Conn.

To take the latter part of the work.

Early King and Roscoe Perry of River Section came over a while Sunday evening.

Jesse Sellers of Mt. Gilford was here Wednesday afternoon.

Calvin Sellers and Warren King were here the first of the week from Bethel.

Our literary society has accepted

challenge for a joint debate from

James Clegg and the Indigoites or

that the contest will be spirited.

ROBISON TO BE MADE A KNIGHT OF PYTHIAS

Birmingham, May 23.—Col. Richmond Pearson Robison, commanding the Knights of Pythias in Birmingham, will be made a member of the Knights of Pythias in Atlanta on Friday evening.

He would be granted a dispensation to be made a member of the Knights of Pythias in Atlanta.

On the day he will be received there will be a grand social and jestered with a certain amount of fun.

On the eve of the election, the Knights of Pythias in Atlanta will be allowed to enter the city.

Being conferred. Members of the order from all parts of Atlanta will be here to the special meeting.

Mr. W. A. Nell District Plant Superintendent of the Western Union Telegraph Company with his headquarters in Atlanta and Mr. J. J. Duane Plant Superintendent with headquarters in Jacksonville are in the city today on business.

VIRGINIA DELEGATES GO WITHOUT INSTRUCTIONS

St. Louis, Mo., May 23.—The delegation of Virginia to convene there today arrived thirty-two delegates to the Democratic National convention at Baltimore. In June at the Old Dominion twenty

more votes in that convention.

With the exception of two instructed to vote for Woodrow Wilson

the Virginia delegation is without

any instructions in preference

resolutions. The first district

selected for Woodrow Wilson

of the state's twenty-four votes

the line up is believed to be evenly

balanced for Woodrow Wilson

and thirteen unpronounced in

stale. Of the latter one half

selected for Woodrow Wilson

and a half line to Underwood, one

for Clark and one for Harman

The null rule will not be applied

until the first day at Baltimore

but it will not affect several bal-

lots have been taken and the others

of the twenty-four votes are cast for

null rule application in the delega-

tion. This was a compromise

with the Wilson forces which were

strong in desire to have the conven-

tion on a preferential record for

their favorite candidate.

The convention adjourned to meet

by 1,000 delegates and alternates

as one of the most harmonious in

Virginia.

The names of Wilson, Clark and

Bryan were carried

on the ballot.

Democrat returns show Harman

in the lead of Wilson, Clark and

Bryan got scatter

ing votes. Harman's majority is

up to 1,000. Roosevelt's majority

is up to 1,000.

Of a total less than 1,000 de-

legates of the state convention has

been returned to Baltimore in

the tenth district convention of

Thomas S. Ryan, son of the New

York banker. Four delegates with

half a vote each were elected in

both the second and tenth districts.

This being the first state conven-

tion since the death of the late Sen-

ator John W. Davis a fine tribute

was paid to his memory as a man

and as a democrat.

The state convention after con-

firming the district delegates to the

Baltimore convention the district

nominees for presidential electors

and state commissioners named the

delegates and alternates at large to

Baltimore with half a vote each.

BODY OF ROBISON IS

TAID TO REST AT HOME

Lynchburg, Va., May 23.—The

burial of Clarence V. T. Robison

who was exonerated in Boston Mon-

day night for the murder of Asa

Finnell took place just before noon

today on the old Robison farm

eleven miles from here the inter-

ment being made beside Robison's

internal grand parents and five miles

distant from his mother's resting

place.

The burial was attended with great

grief, even near neighbors

not knowing of arrangements there

for and only the family was there

and friends and relatives acting as pall bearers and assisting to fill

the grave.

Only Douglas Robison, the chil-

dergo brother accompanied the body

home.

Mrs. Betty Wolf who has been

teaching in the city schools will

return morning for her home in

Demopolis to attend the interment.

She will be accompanied by Miss Belle

Bettler who will be her guest for

a few weeks.

Telephone No. 111

Thursday May 21, 1909

Brace family did not meet with the warm reception at home that he was led to believe he would. English Justice is about as bad as American Branda.

Mr. Hearst's papers don't like the six years for a president and then a rest for life. He thinks it would make more for politics. Certainly it would not make for any more politics of the kind we have.

It is very important that the people of this town observe clean up day. Not only for that day should the prompt to cleaned up, but every day, before and after, they should be kept clean.

A young man went for riding in a kango the other day in a borrowed machine, and he and four others jumped the machine into the river where the draw was turned while travelling at 30 miles an hour.

It is dangerous to keep a pistol or a watch dog about the house. The other night in Atlanta a woman who dated on her watch dog had the misfortune of being stolen and robbed. On investigation it was found that this was also done and everything left out in the robbery. This is it that had been a plot under the pillow of the woman. It would have been off and on somebody.

It is held that three of the eight gangsters in the state were in town yesterday. One of them will not drink or much smoke as he wants unless it be from another man's wallet. The second forbids any of his family from writing anything but a small hand, and it is a waste of ink to make large letters. The third stops his clock at night in order to save wear and tear of machinery. All of them dealing in timber in their country paper on the ground that it is a terrible strain on their spectators to read newspapers even in the day time—Farmville Enterprise.

HELP AN EASY ON

THE EASY

We have associated with the best in each a time that we really do not see him. Like the man who has also dynamite and other highly explosive. It is a thing before us that is and we become as accustomed to the condition.

The fly unless the scientist has gone wrong, is responsible for many of our ills.

He is a darned crooked neighbor and a companion you must watch. He will share your meal with you and leave enough room to make a table for the doctor.

He should be kept out of the house and pushed to death. One can be brought about this starvation diet if the cow stable and house walls and hog pens are kept clean.

AFTER THE SPARROW

It would seem from the New York Tribune that they are after the Sparrows. He must go and hunt other English you patches to the ground. A man of an educated brain has decided upon a plan of electrocuting the birds, by *hastig* genes more seriously less disorder live where around where they can and less ignorant than exists in any state where whisky is legally sold. A conclusion and more of comparative temperature has made

You know if you catch a rat in a trap and he gets away you might as well stop trying to catch any more. The escaped rat gives the alarm, and tells his friends what it is for, and how near he came getting into it.

The English Sparrow is a wise

bird. Probably none of them would ever live to tell it if they pitched in a live wire, but others would find it out somehow and spread the warning. It wouldn't be a week before a bird would fly on the live wire, but would be holding it by its wings on the wire, not clinging to it.

MILLER'S

A very good or money less to buy an Advertiser. But it is too much to amount to nothing.

That other young Alabama boy who had come a first place but did not amount to anything.

In summing them up you can't say of Alabama and go to Texas being and ask what the Harry there amounted to.

In fact many of the crimes that are being committed and they have committed in recent years were in a large part committed by this young men or young men who should have known better. Men who should have known that their crime would find them out.

It seems that there is only one way of staying out of trouble and that is a way we have all known from youth. One should have plenty of work to do and stay at it every day. Too much hunting in bad for the boy, bad for the man, bad for the woman. It is even bad for the family home or the male. Keep busy and if you have nothing to do find a job.

PACKING HOUSE FOR DOTHAN

OZARK, Mo.

Our close packing neighbor Dothan who is a packing house in

one of their plants in a

when you stop to think about it when these people get right b

or rough in they do not let their plants out and it is safe to assume that Dothan will have a packing house. The leading man not only of Dothan but all over Southeast Alabama are interested and are coming down with their sub-subs to the capital stock of the enterprise. This is a matter of vital importance to the rearing of the State and can be think of nothing

so much trouble to the farmers as the building of this packing house. It will furnish a market right here at home for thousands of bags and thousands of head of cattle and an industry far more profitable than raising cotton will be built up right here at home and the thousands of dollars now paid to the railroads to transport these cattle to the Chicago packing houses will remain the property of the farmers who raise them. It would give stock raising an impetus that nothing else will do and in this shape done understanding the business men of Dothan who are behind it, should have the hearty co-operation of not only the business men but the farmers as well throughout Southeast Alabama.

AN OKLAHOMA VIEW

OF KANSAS

The editor of the *Advertiser* in

the city of Tulsa, Okla., has been visit

ing Wichita and public has a

copy of his paper his opinion

of the statement that some Kansas man has made to the effect that

Kansas uses more hogs today than

they would use without the prohibition law.

His observations are com-

plimentary to Kansas and are made from a logical standpoint.

In concluding his observations he says

Go to the parks of Wichita, Topeka

or Hutchinson or one of the larger

towns. Attend the state and

county fairs or any gathering of

Kansans from Iowa or country or

both. Take a peep into the then

tree or the moving picture shows

Go to the churches if you will, but

you do not even need to do that.

Use your eyes. Study the faces and

the actions of the people you meet

on the road. An unobtrusive picture of the Kansas man will be more intelligible than any

electrocuted birds, by *hastig* genes more seriously less disorder

live where around where they can and less ignorant than exists in

any state where whisky is legally

sold. A conclusion and more of

comparative temperature has made

its mark. If that does not satisfy

you go to the records of the poor

and insane. Note almost total ab-

sence of poverty and insanity. Ex-

cepting rashes you will not find nor

extreme poverty. But you will find

a greater percentage of people in

comfortable circumstances than

just, why not anticipate and guide

most anywhere any where else you may go look at the bank deposit in the firm and city improvements, the automobile at the steel men now people put their money into those things instead of into houses consider the low percentage of interest and the high percentage of all graduate students and graduate

graduates.

Editor of the Dothan Eagle, star

so on your life.

ABOUT THE JACKING

HOUSE

In speaking of the packing house population the other day I met who I travelled extensively all over the United States and a man who owns a big farm in Houston county said I have noticed that in those

places where the farmers raise

peas and cotton that they are all

rich and plenty in cotton the farm

ers are poor just like they are

here in Alabama.

Where the lands are rich they

probably make with the holl weevils

more cotton than we do. When we

reach an however, we have no

work. We have to buy fertilizer

and every pound of cotton we raise

is worth all we can get for it even

with the best of conditions.

When the farmers of this section

get into the hog business and can

find a ready market for their hogs

every day in the year the holl weevils

will be less terror than us.

This is the time for work to come

on. No use in waiting till the

autumn and make us miss a couple

of crops and puts the farmers in

debt and the merchant who furnished

the men in the holl that will be

too late.

It is true we do nothing about the packing house business. It is time to turn better known to us

than before. We can employ experts

who do know and we already know

how to produce the house of cheap

is too.

The people who are putting their

money into the packing house busi-

ness are not doing no harm.

They are not doing good. If

they do not make big dividends is

not their fault but by the plant the

factory in which they are built

then the people who are not doing

well. There are other business

which are not doing well. There are

other lines of business will not do

well. The packing house should then

be merely an easy means to protect

one's other business.

Editor of the Dothan Eagle, star

so on your life.

THE JEFFERSON TAX RAISE

BY J. E. LEE

The unprecedented rule of tax

valuation in Jefferson county by

the Tax Commission is a

matter of abomination and un-

fair. There is no mistaking the

intoxication of the new

law. The talk among all classes

of business men behind a strong

public opinion against hardness that

excludes the necessity of such a

radical step.

The original view point is nor

mal rule. By the action of the

Chamber of Commerce in calling

a meeting of the business men of

the city and county for tomorrow

afternoon the proposed rule of

valuation is to be voted on.

The *Advertiser* is reproducing this paper

comment on the Tax Commission's

course and at the same time ex-

plaining its opposition to these

views. The *Advertiser's* editorial is

reproduced on this page.

It is an interesting fact that so

for the action of the State Tax Com-

mission has not been publicly ex-

plained or justified in any way by its President, Hon. Lee Long,

or by his associates. The general

policy of the Commission in the

whole state has not been outlined

or defined. If such heavy rates as

those in Jefferson are being accom-

panied by equivalents in the rest of

the state or in any other counties

the fact is not known. The Tax

Commissioners are public adminis-

trators public servants. They should

not hesitate to take the people in

to their confidence. Their entire

work must ultimately be known and

reviewed by public opinion. Why

should they not tax now? If they

are right as to their action in Je-

fferson county, if it is equitable and

just, why not anticipate and guide

public opinion in sustaining their

policy?

The very hop is that the Commis-

sion will not. If off the upper

chances to use the columns of this

paper. The public will read gladly

any statement from Mr. Long, or

from Mr. C. C. Brainerd, Birmingham.

Now we are

fully aware that

the man who intimates that he

could tell you something that would

open your eyes will if you just

live in time.

Tell the persistent agent that you

are handling his line but have just

stopped to catch your breath, and he

will let you alone.

Friday, May 1, 1909

It is very difficult that it will be in the interest of a bank and we to act as the educated white protest of the United States he would be in danger of being persecuted. It is sure that if Lincoln had been a president when Roosevelt was in the plant and buy him a ticket out of town. The line consolidated machinery he has enough to get out a daily Congressional Record but he has convinced the people of the town that he knows what is good newspaper service he is giving it to them. It is cheaper for the mechanics and business men of his town to go to one good paper than two or three poor ones.

About the next thing the Star man will do will be to put on a daily and then he will make his automobile and go to work. It will take about all of the time to run a daily and he will go to his car Sunday.

A HOME INDUSTRY
Ozark Star

We venture to assert that in the past two years fully one hundred thousand dollars has been carried out of this section of the state for stock subscriptions to American companies and gold mining schemes of one kind and then another and up to this good hour we have failed to see one single dividend check that any of the stock holders have received from their investment. This money is gone, never to return. Those who made the investment thought that they were getting value received or they would never have put their money into the propositions. It was an error of judgment that is all.

Now the people who are behind the mining, house movement at Dothan will give the people of South and Alabama an opportunity of taking stock in this enterprise. The promoters do not claim that it will pay 100 per cent nor any other percent, but they do claim that the enterprises are profitable at other places and there should be no reason why this one to be established at Dothan should be an exception to the rule. Certain it is that the men who are putting their money in this enterprise are business men who do not make a practice of taking stock in wild cat schemes and who are well known to the people of this section as good headed smart business men. Instead of buying stock in foreign enterprises from every fifth boy up the river, this comes along, try a batch of the Dothan house stock, own it by lots, people controlled by home people.

Whether all of these changes will stand in the light of scrutiny to vestigate it remains to be seen. It is important now to much in Judging the accuracy that can be cast on the experts and primitive men, which are dependent thereon that the question here raised is an thoritatively settled. In the case of typhoid the evidence appears to be complete.

In favor of the claims of the attorney of New York has attempted to supply facts on this question. He has examined the files caught in the most populated part of New York City during a number of months. Both the facts in regarding the incidence and those from the surface of the insects were investigated. The files examined in April and by this time were completely free from dangerous bacteria. At the summer season advanced high bacterial counts began to appear and do an abrupt change in the character of the bacteria. The record counts came at the end of two weeks of successive heat in July.

Some idea of the number of insects that a single insect may carry is indicated by the figure 670 to 4,400,000 for the surface contamination and 1,000 to 25,000,000 for the intestinal bacterial contents. Most of the bacteria found were comparatively harmless. This investigation however was carried on in the crowded city, where sewers would naturally carry all the most dangerous infective matter. The Journal of the American Medical Association says that the house

realizing this as all others do but it is a question with him as others how to minimize its evils.

Only a few days ago a pathetic story came to us from South Bend, Ind., telling of the downfall of a young man who is liable to be pitied than condemned. A young man of the name of Charles Lancaster had been considered and sentenced to the penitentiary for fourteen years for killing a man at 1000. He had never served a year of his sentence and was released on the promise of good behavior in the future. Up to this time he had resisted the temptation to drink and visited his old associates but the old devil is still as true to his old ways as ever. But what is the result? He had not been put in his wretched

The Dothan Eagle

It is too late for him to catch the step in life's other callings, and he sticks to holding down some of the unimportant posts.

Before that shortage is made up communities will have to realize that they gone to waste.

NEWSPAPER ARCHIVE®

NEWSPAPER ARCHIVE®

San Jose Scale is to be treated and Lime-Sulphur will be given in the Spring.

Trees need some spraying usually on about the same lines as the work given to the apple orchard, spraying about twice annually, usually two to four times each year and in all cases must be thorough to be worth while. Careless spraying is a waste of time and material. When the San Jose scale is to be treated the lime-sulphur spray will be given in the spring. A heavy spray of Bordeaux mixture or of plain Bordeaux solution before the buds open will aid in checking brown rot and other diseases. Another spraying of Bordeaux mixture with arsenical pink added should be given soon after the blossoms fall. It should be specially noted in this connection that Bordeaux mixture should be only half strength for plum trees. Some varieties especially those of the Japanese group have the foliage seriously injured by strong Bordeaux. Perhaps the best formula for this work is as follows: Fresh unslaked lime three pounds, copper sulphate two pounds water, fifty gallons.

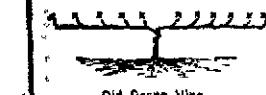

The mixture is then made up in the usual way and applied with a nozzle giving a fine, misty spray.

GRAFTING OLD GRAPE VINES

Graft a Little Above or at Level of Ground, or Even Below, is Best Method

In reply to a query as to whether it is possible to graft as shown in the diagram, I can successfully graft it. Gladwin of the Geneva Experiment station writes in the latest New York as follows:

"I should say from your diagram that the vine in question is trained to the horizontal arm spur system and you desire to graft the numerous arms along the arms. It is very doubtful that you can be successful if there is too much opportunity for the parts to dry out before a union takes place. I should much prefer to graft a little above or at the level of the ground or even below. This can be done as in top-working apples, cutting the scion a little thicker on the outside. It is best to graft the lamer opposite a bud placing the scion in the cleft so that the

Old Grape Vine

and forces out and is at or just above the level of the cut stock. If the stock be large enough, insert the scion. After they are placed so that the scion and stock are in contact, mound up dirt firmly till the top bud of the scion is just exposed. If it is impossible to do this

grafting before sap flow begins, repeat it till the vigorous flow is over and then do it. There is a decided interruption after the first flow. Some even prefer the latter period for grafting as it will be a simple matter to train the growth as before and you will have a better time than could possibly be obtained in the way you suggest.

Rest Period for Trees

All trees and shrubs in fact all perennial plants must have a period of rest. This is true even of the evergreen, whose foliage, while retaining its color is as nearly dead a state of vitality during the winter as those trees which shake off their leaves in the autumn.

Grapes

The grape is an American fruit for the most part. It can be easily propagated and grown. You don't have to make wine and yet it can be a few hours.

HORTICULTURAL NOTES

Gather all the brush from the orchard and burn it.

Trees injured by frost are often need to be severely cut back.

The appearance of the orchard is helped by clearing it of dead branches.

Keep the orchard land in good till.

The trees can be set as soon as the leaves fall.

Goseberries require a cool situation with plenty of air and moisture and should be heavily shaded.

As soon as caterpillar nests are in evidence, burn them without delay before new colonies are formed.

Good fruit can be raised only with care and attention given to spraying, pruning and generally good care.

Gather up dead branches and burn them as they are apt to harbor bark beetles one of the worst orchard pests.

Blackberries should be given space in the garden for these are few if any fruits that give quicker and better returns.

A yearling tree is preferred by many to older trees. They are thought to be safer to transplant than two-year trees.

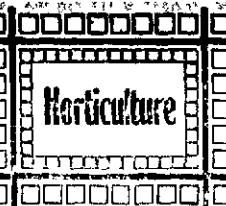

Plant a cover crop in the orchard. Rye, barley, wheat and oats are good non-leguminous plants but the legumes are better.

Don't expose the roots to the hot sun and drying wind. Keep them in a puddle until the moment you are ready to plant them.

If some of the trees are girdled but partially they may be distorted successfully by using a pair of sharp and even shears.

If strawberry plants are dried out when received by express do not water them. For water on the foliage will quickly cause the crown to rot. Dip the roots in light water and lay them in a cool cellar for a few hours.

If the scion is dried out when received by express do not water them. For water on the foliage will quickly cause the crown to rot. Dip the roots in light water and lay them in a cool cellar for a few hours.

DEAL WITH CUT-WORM PEST

Test Course is to Plow in Fall and Renew Bar in Spring—Poisoned Bran May Be Used

The test course is dealing with cut worms is to plow early in the fall and confine cultivation with a spring-toothed harrow until freezing time prevents it and then renewing the bar on them by extra early spring cultivation.

There is no easy method of dealing with these pests but they may be killed if one is willing to go after

Two Species of Cut Worms. Alet Moth That Lays the Eggs

hem with determined all. An effective method of combating them is to use sweet and unjoined bran mixed with Prairie Farmers. The method is a mild one: mix half a pint of Prairie green by weight to 1 1/2 to 4 pints of bran, stir this together while yet dry, and then mix it with water. It has been suggested by the addition of strong or coarse molasses. The older and stronger the molasses to give it color the better it will be.

The bran should be moistened with this sweetened water until it is made into a damp mass. Just wet enough to stay in little heaps. A very small pinch of this placed at the base of each garden plant to protect it will be effective. The worms will not be attracted to the plants.

To protect corn it is advisable to drop a pinch in the corn rows, a dozen or two across the field, so that the worm will find this and eat it instead of the corn. It would be better to let the corn remain. It would be better to let the worm eat the corn before it is harvested. The worms eat the corn more than to let it in trunks to the plants.

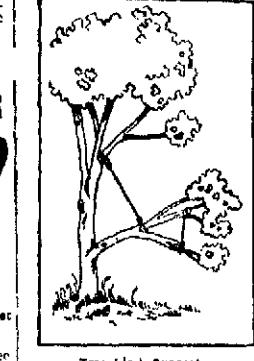

remain saturated until after the corn is once cut off.

It is much better to put out the poison in in the evening while it is damp, or in a damp day, so that it will not be dry when these pests come forth at night in seek their food. 1 1/2 to 2 lbs. of bran by them just about to maturity. If it is slightly covered with earth and for this reason it should become necessary to root them down from it one month cover it with loose earth at the time of sowing.

SUPPORTER FOR TREE LIMBS

Wire Contrivance Fastens Gagging Branch to One Above—Illustration Shows the Plan

A contrivance for supporting limbs of trees that are either broken or sagging with their own weight or a heavy burden of fruit has been designed by a California man. Two iron hooks have slots at both ends and are set at one end. One of the hooks is thrown over a sound upper limb near the crotch and the other is adjusted on the limb below that requires support. A piece of wire

Tree Limb Supporter

Four cups of sulphate of potash to 1 1/2 cups of water makes a good solution for killing bee hives. Benzine is also beneficial. Both applications should be washed off twice a week apart in order to do the work thoroughly.

Box shells are safer for fattening hives than single shells but the difference in cost is hardly worth while, for with ordinary cane boxes can be fattened to just as good condition when tied in single shells as when tied in box shells.

LAWN MOWER REPAIRING

Most people find that their lawn mower is out of order in the spring, and will not cut. We make a specialty of repairing them and sharpening them.

BRING YOUR TROUBLES TO US

Anything in the way of bicycle repairing reasonably and promptly done.

W. J. BURDESHAW & CO.

105 South Foster St.

Vulcanizing

I am prepared to handle your tire work promptly. No job is turned out that isn't thoroughly tested. If not satisfactory, I make it right.

J. H. Hubbard, at

Martin-Hanson Garage

We do expert repair work on your automobile. If you have trouble bring it to us. Ask our customers as to the class of work we do.

Martin & Hanson
